Certified B Corp

We became a BCorp because we feel strongly about social and environmental issues. Our commitment to the BCorp process shows a wider intent to help people and the planet.

We resolved a few years ago to change the business for good – not that it was particularly bad beforehand. The discipline of the BCorp process forced us to ask questions that we hadn't previously and become much more diligent about monitoring evidence about our impact.

As part of this, we made a commitment that each year we will donate at least 5% of our annual revenue to charity through cash donations, books and online products plus increase our pro bono work.

Charities we have supported over the last couple of years include:

The Concise Advice Books

The Concise Advice series was invented by Kevin Duncan and his publisher. It now contains over 40 books, 12 of them written by Kevin, Sarah and Rosie.

Unlike most business books that are too long and padded out with too much material, these books take the full wisdom of wide-ranging business reading and reduces concepts down to their pithy minimum, typically on one spread.

On average each book or topic is the result of over 25 other books, researched, summarized, condensed, and re-purposed to generate templates and techniques ready for immediate action and application.

Deep wisdom, judiciously applied, means that the books, topics, templates and customized material are a fertile resource for any business.

This allows the time-pressed executive to grasp ideas at speed and put them into practice straightaway.

The handy pocketbook format is ideal for training, note-taking and idea generation on the go.

With their highly visual format and minimal copy, the books have a wide international appeal and have been translated into over 20 languages.

Sales to date are around the 250,000 mark.

Ten years on, many of the Concise Advice series titles are now available in paperback.

The Smart Performance Book

The Smart Performance Book provides the gateway to the wisdom contained in all our other books.

At its heart is the ingenious ACES System®. Far more commercially astute than basic psychological profiling methods, the system enables you to highlight your self-improvement areas, and immediately provides you with the learning material to develop your skills.

It covers every aspect of high-functioning business performance, from attitude, action, creativity and communication to efficiency, empathy, strategy, and sustainability.

There are 56 possible typologies, based on your primary and secondary strengths.

The ACES System® Online

The Aces System® is also available online. Here's how it works for individual skills assessment and microlearning.

Step One:
Take short online
self-assessment of 80 questions,
which takes around 5 minutes.

Step Two:
Receive an instant personalised report, including individual typology, skills histogram, and over 150 pieces of built-in signposted self-improvement microlearning. No piece is longer than 3 minutes, but there is over 8 hours in total.

Smart Business Performance

For Companies

Companies can use The ACES System® to gain an immediate overview of the skills range of their staff, analyse current team strengths and weaknesses, identify skills gaps, provide immediate signposted microlearning and development support, and inform recruitment and training decisions.

Appraisals are transformed by the presence of quantifiable data, and results and progress achieved can be monitored four times faster than normal training assessment programmes.

The Smart Performance Interactive Workshop

To our knowledge, there is no other workshop like this in the world.

We can take up to 20 attendees in each session. This could be a specific group such as a leadership team, or we can work through an entire company.

First, everyone takes the test.

Whilst Kevin works through initial helpful material, Sarah collates all the responses. Within 30 minutes, we present the full picture to the room – an overview of all the skills present.

We explain their typologies on the spot, discuss team dynamics, and immediately provide the training themes that are most relevant to the people in the room.

So for example if a high proportion of attendees require training on creativity, we deliver it immediately. Equally, we can work through material on attitude, action, communication, efficiency, empathy, strategy, or sustainability.

This format provides on-the-spot help for those needing to develop their skills.

The Employer Employee Value Exchange

Following a lot of conversations with CEOs and HR Directors about training, staff skills, team morale, and the challenges of sustaining a skillful and motivated workforce when they are frequently working at home, we conducted a survey.

The main themes that emerged were about finding or developing people who understand what the employer/employee value exchange is. These people:

- Are properly engaged
- Drive their own career development through presence and profile
- Understand what is expected of them as an employee in the modern workplace
- Take ownership of their work
- Can think independently and broadly
- Demonstrate leadership qualities
- Understand true strategy, rather than just the transactional, tactical or short-term

In response to this, we have created a new training product that helps people with engagement, ownership, presence and independence.

EXAMPLE CONTENT

- TRUE ENGAGEMENT**
 - Being yourself
 - You are what you do
 - Owning your career
- PRESENCE & PROFILE**
 - Motivation
 - Knowledge
 - Confidence
- OWNERSHIP OF YOUR WORK**
 - Setting clear direction for yourself
 - Essentialism
 - Autonomy & purpose
- INDEPENDENT THINKING**
 - Assertive inquiry
 - Owning your own thinking
 - Clarity & resilience

SUMMARY

This is for companies whose workforce has become somewhat disaffected and for those who are failing to commit or engage with collective culture.

OUTCOME

Once completed, there will be a greater sense of unity and purpose in the team or the whole company. There will be no misunderstanding between what the employer expects of staff and what staff understand is expected of them. This clarity leads to a more purposeful group who know what they are doing and why, leading to faster outcomes on projects and happier people all round.
